

Casey Reyes

Santa Clara, CA ♦ caseyereyes@gmail.com ♦ [Portfolio](#) ♦ [LinkedIn](#)

Highly motivated software developer with 4+ years of industry expertise, actively seeking Senior Software Engineer opportunities. Proficient in web applications, software development, and scripting, delivering outstanding results. Strong interpersonal skills, a solution-oriented mindset, and adept at multitasking in collaborative environments.

EXPERIENCE

Bitwise Industries

Oakland, CA (Remote)

Software Developer

March 2022 – June 2023

- Contributed as a software developer in a web development team, working closely on client projects to create engaging, functional, and responsive web applications.
- Employed Agile methodologies to assist clients in designing and deploying their web applications, ensuring iterative feedback, frequent communication, and adapting to changing requirements to meet their unique needs.
- Effectively resolved client issues and roadblocks within their online platforms, leading to a significant 25% improvement in customer satisfaction levels.

Cadence Design Systems

San Jose, CA (Hybrid)

Product Engineer

Jan. 2020 – Nov. 2020

- Collaborated as a product engineer within a team responsible for product development, contributing to the development of innovative solutions.
- Worked closely with clients to understand their needs and successfully implemented tailored solutions within the circuit design software.
- Developed and implemented custom scripts for clients, automating manual workflows and resulting in a 300% improvement in efficiency.

National Instruments

Santa Clara, CA

Senior Software Technician

Apr. 2019 – Jan. 2020

- Assisted clients by automating tasks and providing support within the circuit design software.
- Led the redesign and development of a custom software development service for a tier-1 customer.
- Successfully delivered the custom development service, optimizing workflows and enhancing overall performance.

AWR Corporation

Campbell, CA

Junior Software Engineer

June 2012 – Oct. 2018 (Part-Time)

- Demonstrated initiative and a strong grasp of scripting languages to successfully streamline internal processes.
- Took ownership of tasks and demonstrated proactive approach to problem solving.
- Proactively learned and tested new software applications, quickly grasping their functionalities, and conducting thorough testing to ensure their effectiveness and reliability.

EDUCATION

San Jose State University

San Jose, CA

Bachelor of Science in Software Engineering, Minor in Mathematics

May 2018
